2 Complex non-linear modes In this first section, an extended definition of non-linear modes is proposed. It is, in essence, related to previous definitions by Rosenberg [1], Szemplinska-Stupnicka [3] or Shaw and Pierre [4] but is also inspired by the definition of complex modes for linear systems. A complex non-linear

The linearized stability analysis of dynamical systems modeled using finite element based multibody formulations is addressed in this paper. The use of classical methods for stability analysis of these systems, such as the characteristic exponent method or Floquet theory, results in computationally prohibitive costs. Since comprehensive multibody models are "virtual prototypes" of actual ...
